## organic joyful relaxing

On a visit to Italy I got to be a part of designing these quality ropes; learning about weaving and twisting techniques. The craft behind the Italian ropes became the center of the lounge group. Together with an aluminum frame, teak and textile, the materials intervene and play together for a tactile experience, creating contrasts between the warm and cold, organic, and geometrical. With soft and curvy lines, the shapes of the lounge furniture wraps around the body. With loose back cushions, it is easy to create individual comfort, ensuring relaxing and joyful moments.
