vibrant functional majestic

I am captivated by the shapes of nature. How they intervene and complement each other yet looking majestic standing on their own. This fascination became the concept behind the mindo 109 side table. The vivid yet calming lines form the silhouette of the table, making room for a practical shelf inside. The colored aluminum and natural teak provide a functional use yet are visibly aesthetic. The shape are designed to stand by a single lounge chair, as well as complementing a grander lounge environment, making it versatile and easy to create a vibrant atmosphere.
