### Comfortable, Relaxing & Tactile

This lounge group is all about its organic form and the combination of materials: Tactile rope, smooth aluminium, warm teak, and soft fabric.

The design details may be subtle but elevate this lounge group to something unique and beautiful. The loose back cushions send an inviting vibe as does the ample daybed of the series. The mindo 107 collection transforms any outdoor terrace into a new green living room, erasing all boundaries between indoor and outdoor furniture.
