Simple, Functional & Enjoyable

The designers were given a clear task – to bring innovation and sustainability into a classic category. The result is our mindo 120 serving trolley, whose design enables the product to be transported in a flat package and thus indirectly contributes to climate protection. Mindo 120 is made of specially made aluminum sheets with practical holes that drain rainwater. The smooth curves of the frame and handle reflect mindo's design language, while the large wheels enables effortless movement between the patio and indoors areas.
