Dark Grey 070

Materials & Care

ALUMINIUM is a lightweight, yet strong and durable material and ideal for outdoor furniture due to its resistance to corrosion. All our aluminium undergoes a high-quality, solvent-free powder coating for extra protection before being processed. If the coating is damaged due to dents or scratching, moisture can invade and eventually damage the aluminium. Regularly remove dirt with a sponge or soft brush, lukewarm water, and a mild dishwashing detergent. Never use solvents. Thoroughly rinse with clean, fresh water after cleaning to remove all soap and dirt residue.

Storage & Covers

The mindo 120 trolley can be left outside during the entire summer season. During the off-season, we recommend storing the trolley in a dry and ventilated place, like a covered patio or similar. Alternatively, take the trolley inside the kitchen or similar and benefit from its versatility and design all year long. If left under a furniture cover outside, the cover should be placed in such a manner that it is kept slightly away from the furniture to minimise condensation and allow for free air circulation. Condensation forming under the cover during storage, as well as furniture or cushions that were damp before storage, can cause mould and mildew. Therefore it is vital that the furniture as well as any cushions are completely dry before storage. Checking the stored furniture regularly and letting moisture escape by lifting the cover on dry days is helpful. We recommend storing any loose cushions upright or in a slanted position for maximum air circulation. Placing them with their backside up will protect the more visible parts if staining should occur.

There is not specific Cover to fit the mindo 120 trolley but can be stored with other furniture under their respective Cover.
